# RükTECH Polished Ceramic Coating

RükTECH introduces its Polished Ceramic Coating for low temperature applications. Are you doing restorations and you need to brighten things up under the hood? Are you trying to reflect heat away from intercooler piping, charge piping, or Intake manifolds? RükTECH Polished Ceramic coating would be a good fit for you if you are trying to do these things. We don't recommend this coating for applications that are not tuned properly or if you are not going to be maintaining the finish of the coating. You will need to clean and polish the coating to maintain the finish. If you don't want to do this then this is not the coating for you. This coating will also discolor if you get it too hot from incorrect tuning or with prolonged use. If you don't want to see dulling or discoloring on the coating please choose alternative coatings which are better for performance and protection. We highly recommend RükTECH Bright Silver Ceramic Coating in place of the polished if you still want a bright finish that has a higher temperature rating and much better corrosion protection. There is also RükTECH Black Ceramic and Titanium as well. NOTE: We don't recommend polished ceramic coating for racing or high heat applications (over 1000 egt's) due to discoloration issues and timely maintenance.

## Benefits of RükTECH Polished Coating:

- Great for Intake Manifolds
- Increases Component Life
- Reduces Under hood Temps
- Great for Intercooler Piping, Charge Piping
- Superior corrosion protection from salt and rust
- Performance Gains over non-coated parts
- Perfect For Restorations to Brighten things under the hood
- Excellent Impact Resistance
- Will work on New and Used Components
- Will not turn Blue, Oxidize, or Stain Like Chrome or Paint
- Peace of mind that your Parts are Protected and Performing

## Parts You Can Coat with RükTECH Polished Coating:

- Headers
- Exhaust Manifolds
- Intake Manifolds
- Exhaust Piping, Intercooler Piping, Charge Piping, Etc.
- Snowmobile Expansion Chambers
- Mufflers On All Applications
- Brackets
- Any Steel substrate
- Any Lower Temperature Application
