# RükTECH Racing Coatings

RükTECH has race-proven coatings for your track vehicles to keep them running at peak performance. With today's high horsepower and turbo boosted motors, high temperature ceramic coatings and engine internal coatings have become paramount to winning. Call today and see how our coatings will make your race application the best on the track.

## Benefits of RükTECH Polished or Black Coating:

- Increased Component Life, Reduced Skin Temps
- Reduced Under Hood Temps
- Superior corrosion protection from rust
- Performance Gains over non-coated parts
- Polished, Black and Gray colors
- Excellent Impact Resistance
- Will work on New and Used Components
- Will not turn Blue, Oxidize, or Stain Like Chrome or Paint
- Heat that is retained in the pipe provides faster turbo spool and quicker starts on turbo applications.
- Peace of mind that your motor is running at its very best

## Benefits of RükTECH Piston and Bearing Coatings:

- Applicable to New or Used Pistons
- New Bearings
- Increases Radial Tension Life of the Rings by preventing heat soak
- Enhances Flame Propagation and decreases coking on piston tops
- Eliminates Cold and Hot Sticking
- Internal coating on the piston can increase oil shedding preventing heat soak
- Lower running temperatures on Bearings
- 5x to 10x more Bearing life
- Increased oil retention and protection from heat
